

February 6, 2004

OKLAHOMA BULLETIN NO. OK360-4-13

SUBJECT: PER - Technical Service Offices Service Areas

Purpose: To announce revisions to the TSO Service Areas

Expiration Date: September 30, 2004

Effective March 1, 2004, service areas for each of the six Technical Service Offices (TSOs) will be re-established. Attached is a map identifying the service areas for the TSOs, lead technical specialists for each discipline, phone number for each TSO, and the names of all the technical specialists located in each office. Each lead technical specialist will work with field offices to determine the best method for providing technical assistance for them. It is the responsibility for each district conservationist to request technical assistance with the lead technical specialist.

As you will note, there are currently vacancies present for the lead technical specialists for two offices. The Resource Specialist duties for Teams 1 and 2 will be handled by John Mustain until the position at Woodward has been filled. Mark Conkling and David Wells will continue to provide assistance to the Pauls Valley service area until Chuck Stanley completes his acting DC detail to the Lawton Field Service Center. Attached is a map designating the service areas for the Resource Soil Scientists until the Resource Soil Scientist position at Clinton has been filled.

If you have questions concerning technical specialists, please contact the respective Board of Technology contact responsible for that discipline.

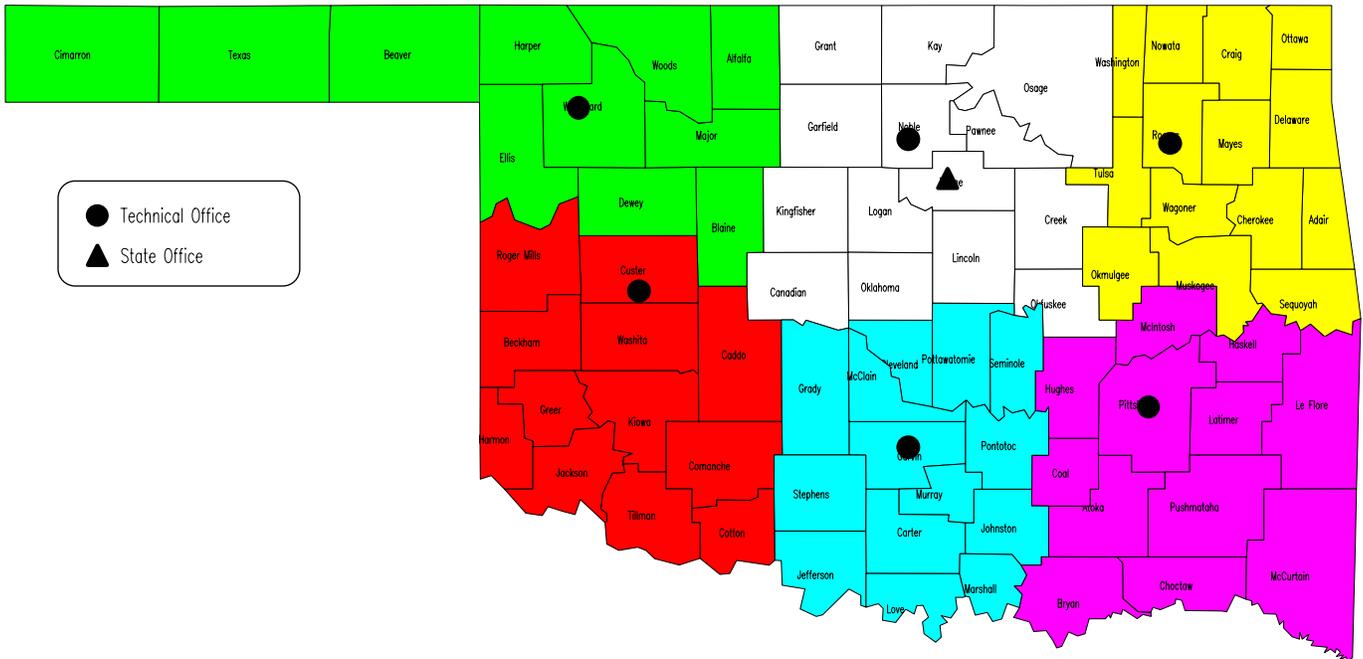

/s/ Kevin D. Norton Acting For

M. DARREL DOMINICK
State Conservationist
